

## Sony Online launches The Buried Sea expansion for EverQuest

by *Bend\_Weekly\_News\_Sources*

### The Buried Sea Introduces EverQuest Players to the Magical Enegeian Powers

Sony Online Entertainment, a global leader in the online games industry, today announced EverQuest The Buried Sea, the most recent expansion for the Massively Multiplayer Online Role-Playing Game, EverQuest, is now live. EverQuest The Buried Sea is available only via digital download, for the suggested retail price of U.S. \$29.99 at <http://www.station.com/>

"The Buried Sea is the thirteenth expansion for EverQuest, which is coming up on its eighth anniversary next month, will not only provide players with new missions and content, but will continue to challenge players with two new worlds to explore," said Christopher E. Sturr, Senior Global Brand Manager, Sony Online Entertainment.

The Buried Sea introduces players to a new type of inventory slot called a Power Source which is used for new equipment available in the expansion, known as an Enegeian Power Source. Enegeian Power Sources are similar to a magical battery and come in a variety of types such as: fire, cold and light. Within the expansion, a new type of armor is available called Enegeiac Armor which, while relatively basic by itself and suitable for a player to wear out in Norrath, is built to be powered by an Enegeian Power Source and comes into its full power when that is the case. For example, when a fire-magic power source is equipped the armor gains offensive stats, increasing stamina, strength, and endurance but weakens the wearer's ability to resist cold-based attacks. Power sources can be changed out at any time, allowing the player to quickly customize their entire armor set to best match the conditions they are fighting in.

"In addition to the Enegeian Power, players will also be actively involved in the gameplay of this expansion from creating their own guild banners to participating in ship-to-ship combat on the open seas against swash-buckling pirates," said Clint Worley, Producer, Sony Online Entertainment.
